

Roof Lanterns

Build the kerb first, then measure the EXTERNAL kerb size, width by projection.

Name _____ Project / ref _____ Date _____

Your measurements

Measure each point with a steel tape, in millimetres.

Width (mm)

Point 1 mm
 Point 2 mm
 Point 3 mm
 Smallest mm

Projection (mm)

Point 1 mm
 Point 2 mm
 Point 3 mm
 Smallest mm

Your options

Self-cleaning glass is included. Pitch and bars are set by your chosen range.

Glass finish _____

Frame colour / finish _____

Measure the outside of the kerb at the top of the upstand.

Measuring responsibility

Measurements are your responsibility. SmartaView is supply only and does not measure, survey or install. Products are made to the sizes you supply, so we cannot accept responsibility for items that do not fit because the measurements supplied were incorrect. If you are unsure, use a suitably qualified professional. This does not affect your statutory rights.
