Why SmartaView

Most premium aluminium doors are sold through showrooms with deep markups baked into every quote. We do it differently. Direct from the British fabricator to your door, with transparent pricing online and the same product the showrooms sell. Just without the showroom.

Live online pricing

See the exact price as you configure. No callback, no waiting for a quote.

No showroom margin

Direct from the fabricator. Same premium product, materially better price.

Made in Britain

Every screen is fabricated in the UK using genuine Smart Systems aluminium.

Free UK delivery

Free mainland UK delivery on all orders, no minimum spend, kerbside on a pallet.

10-year guarantee

A comprehensive product guarantee, with the security of Smart Systems behind it.

Made to fit

Supplied fully fabricated and glazed, ready for your builder or installer to fit.

Made in Britain

Why AluSpace

The industrial steel look is one of the most influential interior trends of the last decade. AluSpace delivers it with the precision, lightness and longevity only aluminium can give, at a fraction of the cost of real steel.

Industrial elegance

The slim aluminium framework gives you that signature steel look without the cost, weight or rust of real steel doors.

Light and air

Glazed screens let daylight travel between zones, opening up the smallest spaces and keeping rooms feeling bright.

Acoustic separation

Solid double glazed units make an effective acoustic barrier, so you can zone open plan spaces without the noise.

Slim sightlines

Profiles are kept minimal, putting the focus on the glass and the rooms it frames rather than the framework itself.

Limitless layout

Just a handful of core components combine into hinged, pivot, sliding and fixed configurations, in any shape or size.

Built to last

High quality powder coated finishes need almost no maintenance and stay looking sharp for decades of daily use.

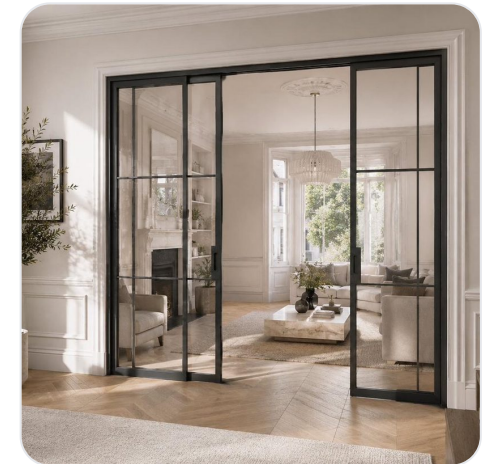

THE SYSTEM

The AluSpace system

Just a handful of core aluminium components combine into hinged, pivot, sliding and fixed configurations, giving architects, interior designers and homeowners almost limitless ways to divide a space without losing light or feeling.

- ✓ Slim profiles in a signature industrial steel aesthetic
- ✓ Hinged, pivot, sliding and fixed configurations from the same core system
- ✓ Single or double doors in widths from 400mm
- ✓ Choice of 6mm, 8mm or 18mm glazing, plus acoustic 4-10-4mm sealed units
- ✓ Visible hinges, concealed pivot or sliding mechanisms to suit any aesthetic
- ✓ Soft close upgrade on pivot doors so they settle gently every time
- ✓ Effective acoustic barrier between zones in open plan layouts
- ✓ Powder coated in standard or non standard colours, including textured finishes
- ✓ Minimal maintenance for years of robust, reliable performance

GLAZING OPTIONS

Real homes, real doors

AluSpace works almost anywhere a wall used to. From period townhouses in Bath to apartments in London, here are a few of our favourite places it has come to life.

THE FRAMEWORK

Define the space, not the room.

A glazed screen divides without dividing, partitions a room without dimming a single corner of it. The wall is no longer a wall.

ALUSPACE

SmartaView · Premium aluminium, delivered.

smartaview.com · 07

THE LOOK

Steel without the steel.

All the industrial elegance, none of the rust, weight or compromise.
Aluminium, hand finished, made for the inside of British homes.

MADE IN BRITAIN

Designed for the way you live

AluSpace works almost anywhere a wall used to. From dividing kitchen and lounge to framing a hallway, here are the rooms it does best work in.

Kitchen and dining

Separate cooking smells and noise without losing the visual flow between the kitchen and a dining or living area.

Home office

Carve out a working zone with a glazed screen that keeps daylight flowing and lets you close the door on the day.

Hallway and vestibule

Frame the entrance to a living room or stairwell with a striking screen that adds architectural rhythm.

Bedroom and ensuite

A pivot or sliding screen partitions a dressing area or ensuite without sacrificing daylight in either room.

Open plan zoning

Define zones in a large open plan without putting up walls, keeping flexibility while reducing draughts and noise.

Commercial and retail

Studios, showrooms, restaurants and offices use the same screens to create rhythm and zone larger spaces.

The four door types

Four configurations off one core system. Pick the one that fits your opening, or mix several in the same screen for a layout that matches exactly how you use the room.

Hinged doors

Single or double hinged doors, the most familiar choice, configured for any design theme from traditional to industrial.

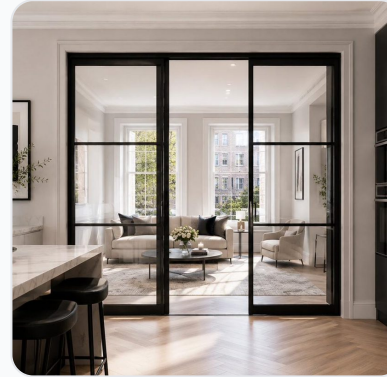

Up to 900mm wide, 2200mm high, 60kg per sash

Pivot doors

A dramatic centre pivot creates wide, statement openings up to 2 metres with the option of adjustable closers.

Up to 2000mm wide, 2500mm high, 100kg per sash

Sliding doors

Slide a glazed sash within the screen footprint to close or partially open the partition. Contemporary or vintage rail options.

Up to 1200mm wide, 2500mm high, 100kg per sash

Fixed screens

A pure glazed partition with no opening sash, divides space while letting light flow through completely.

Up to 1400mm wide, 2500mm high, per panel

Sash weights are maximum per panel with standard rollers. Speak to us about heavier glass specifications including ACINT 213 rollers for sliding sashes up to 100kg.

Hinged and pivot doors

Hinged doors

With a range of widths, glazing, hinge and furniture options, hinged doors can be configured to suit any design theme from traditional and minimalist to contemporary and industrial. Choose visible barrel hinges for a classic steel door look, or concealed hinges for a cleaner contemporary feel.

Door	Single or double
Max width	900mm per sash
Min width	400mm per sash
Max height	2200mm
Max weight	60kg per sash
Glazing	6mm, 8mm, 4-10-4mm or 18mm

Pivot doors

A centre or offset pivot point lets you create wide statement doors up to 2 metres with no visible hinges. Adjustable closers fitted top and bottom keep the sash settled, with a soft close upgrade for that subtle, premium settle on a heavy pane.

Door	Single or double
Max width	2000mm per sash
Min width	400mm per sash
Max height	2500mm
Max weight	100kg per sash
Glazing	6mm, 8mm, 4-10-4mm or 18mm
Closers	Adjustable, soft close upgrade available

Sliding doors and fixed screens

Sliding doors

A glazed sash slides cleanly along an exposed rail to close or partially open the partition. Pick a clean contemporary rail to suit a minimal scheme, or a vintage style barn-door rail when the room calls for character.

Door	Single or double
Max width	1200mm per sash
Min width	400mm per sash
Max height	2500mm
Max weight	100kg per sash with heavy duty rollers
Glazing	6mm, 8mm, 4-10-4mm or 18mm
Rail	Contemporary or vintage style options

Fixed screens

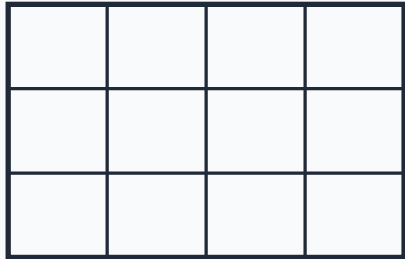

Pure glazed partition with no opening sash, fixed screens divide space while letting light pass through completely. Couple multiple panels with INT255 mullions to span larger openings, or stack them above doors as transoms.

Max width	1400mm per panel
Max height	2500mm per panel
Glazing	6mm, 8mm, 4-10-4mm or 18mm
Couplers	INT255 mullion couplers
Load	0.8 kN/m at maximum panel size
Compliance	Refer to Approved Document K and CWCT loading guidance

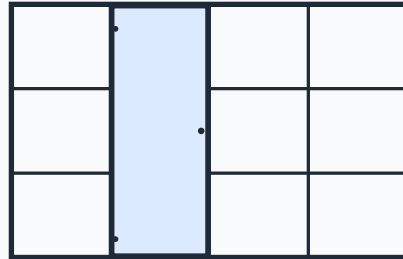

Configure it your way

Mix and match the four door types with fixed screen panels for almost limitless layouts. Below are the eight most popular configurations, but the system is happy to be tailored further to your opening and how you use it.

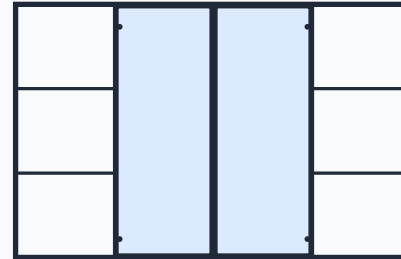

Fixed screen

A pure glazed wall, no doors at all, dividing two zones with full daylight

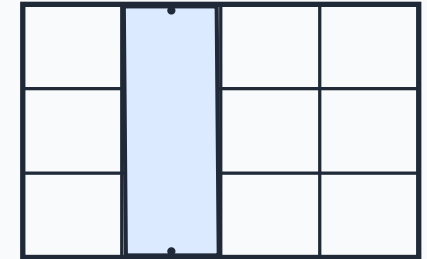

Single door

A single hinged door set within the fixed screen framework

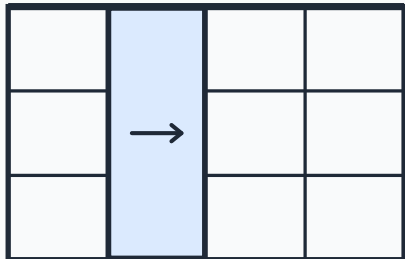

Double door

A pair of hinged doors meeting in the centre for a wider opening

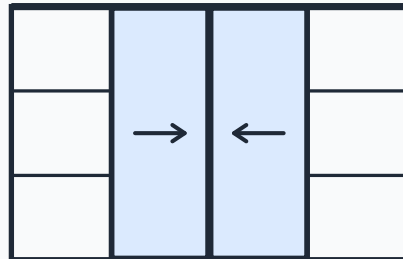

Pivot door

A statement centre pivot door, up to 2 metres wide

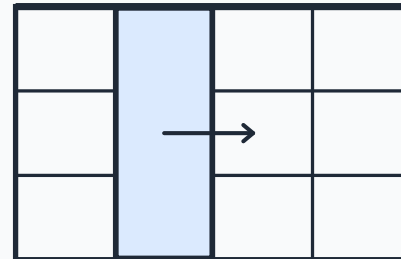

Sliding door

A sliding sash within the screen, ideal where there is no swing room

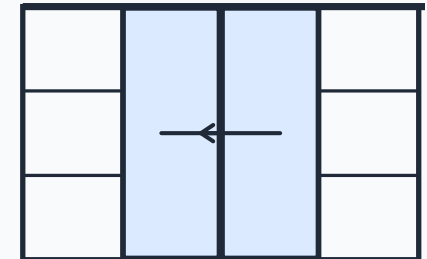

Sliding double

Two sliding sashes meet in the centre and slide outwards

Offset single sliding

The sliding sash runs along an extended track in front of the screen

Offset double sliding

Two sliding sashes split outwards along extended tracks

A selection of popular layouts. Speak to us about further design options including transoms above doors, corner configurations, full height screens and combinations with multiple door types.

→ Build your AluSpace layout at smartaview.com · sales@smartaview.com

Glazing options

Glass choice changes everything about how the screen feels. Single pane keeps the look as light and simple as possible, sealed units add real acoustic separation between zones.

Clear 6mm or 8mm

Single pane toughened glass, the cleanest look for most rooms where partition is purely visual.

Acoustic double glazed

A 4-10-4mm or 18mm sealed unit dramatically reduces noise between zones, ideal for offices and bedrooms.

Obscure or fluted

Privacy where you need it without losing daylight, with reeded, satin or sandblasted finishes available.

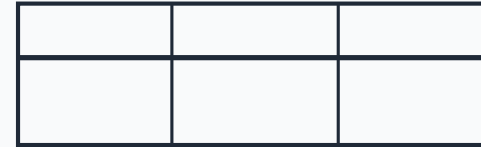

Tinted and decorative

Bronze and grey tints, fritted patterns and applied film can all be specified to suit the interior scheme.

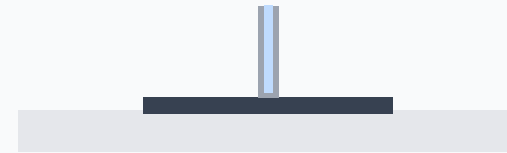

Acoustic sealed units offer a meaningful step up in noise reduction between zones. Speak to us about specific acoustic ratings for your project.

Transom detail

Horizontal transoms break up taller panels into elegant proportions and let you sit a fixed transom above a hinged or pivot door for a smarter, more architectural look.

Threshold detail

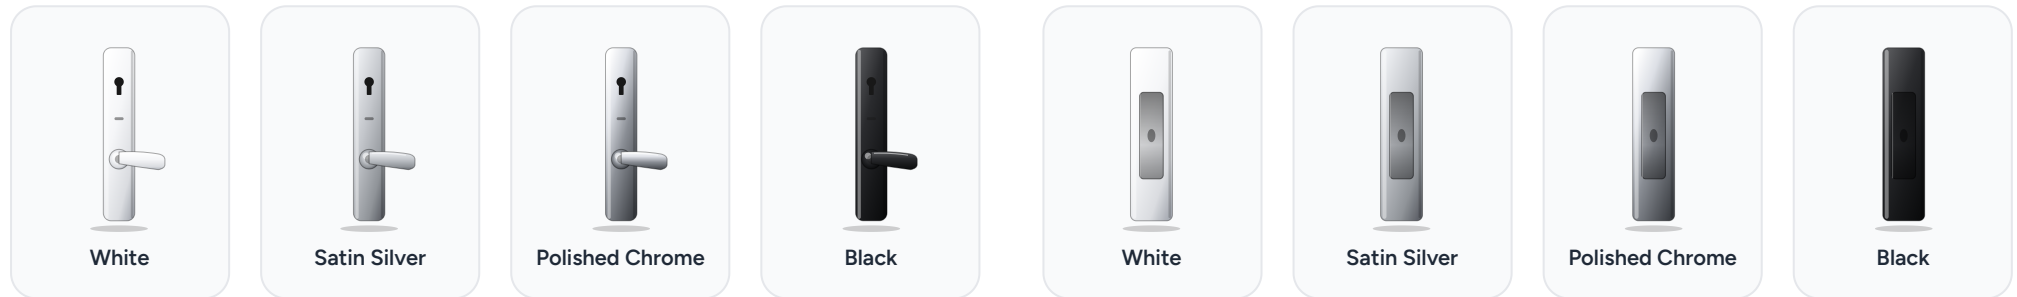

A discreet floor track on sliding sashes, or a near flush threshold on hinged and pivot doors. The system is happy on level interior floors, with floor type considered as part of your specification.

Handles and hardware

AluSpace door furniture is the small detail that makes or breaks the steel look. Hinged and pivot doors take a lever handle on a slim backplate. Sliding doors use a flush pull, recessed into the sash so nothing protrudes when the door slides past the frame.

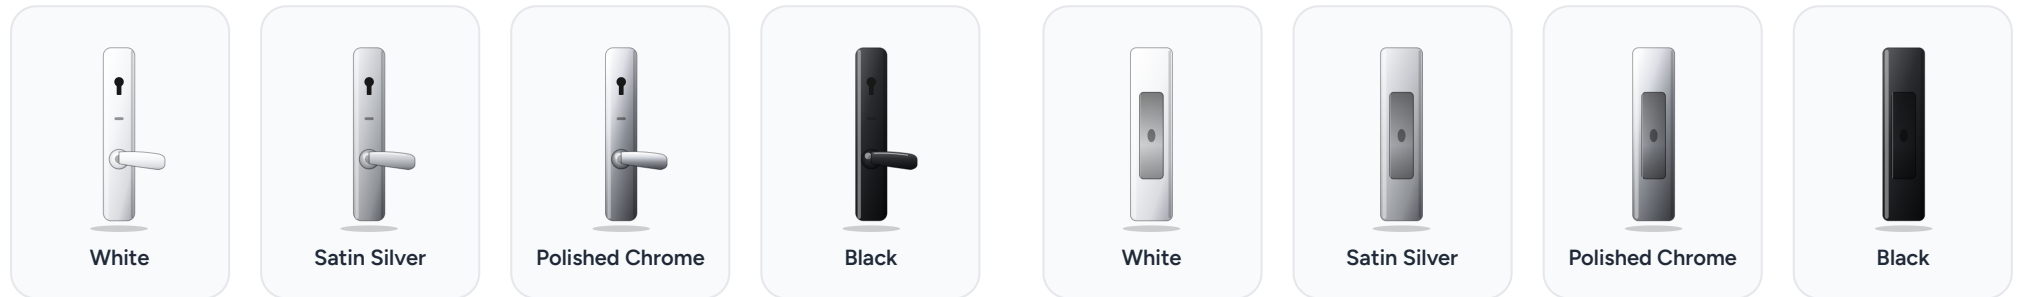

Lever handles for hinged and pivot doors

Lever on rectangular backplate, available in four standard finishes.

Flush pulls for sliding doors

Recessed flush pull that sits within the sash profile.

All standard hardware is UK sourced and high quality as standard. Premium upgrades, including heritage shapes and warmer finishes, are available on the next page.

Hardware upgrades

Looking for something a little different or higher end? Pick from a curated range of upgrade hardware in heritage shapes, warm finishes and full height designer pulls. Configured on the product page, so the price updates live with your selection.

HERITAGE

Monkeytail lever

A hand finished lever with a coiled tail in pewter or aged iron, made for steel look heritage doors and period interiors.

DESIGNER

Brushed brass knob

A warm, lived in finish that softens the industrial frame and ages beautifully over time.

STATEMENT

Long T-bar pull

A sculptural full height pull handle, ideal as a statement on tall pivot or sliding doors in a feature wall.

Soft close upgrade

Available on pivot doors, the soft close mechanism settles the sash gently into the closed position, a quiet luxury you notice every time the door closes.

Concealed hinges and pivots

Swap visible barrel hinges for concealed hinges, or specify hidden pivot points top and bottom, for a cleaner look that lets the framework speak for itself.

→ See all hardware options live at smartaview.com · sales@smartaview.com

Life is better in colour

Frames are powder coated for a low maintenance finish that holds its colour for decades. Black anthracite is the signature industrial look, but the system is happy in any colour for any interior scheme.

Industrial classics

The three signature finishes for an industrial steel look
