Why SmartaView

Most premium aluminium doors are sold through showrooms with deep markups baked into every quote. We do it differently. Direct from the British fabricator to your door, with transparent pricing online and the same product the showrooms sell. Just without the showroom.

Live online pricing

See the exact price as you configure. No callback, no waiting for a quote.

No showroom margin

Direct from the fabricator. Same premium product, materially better price.

Made in Britain

Every lantern is fabricated in the UK using genuine Smart Systems aluminium.

Free UK delivery

Free mainland UK delivery on all orders, no minimum spend, kerbside on a pallet.

10-year guarantee

A comprehensive product guarantee, with the security of Smart Systems behind it.

Made to fit

Supplied fully fabricated and glazed, ready for your builder or installer to fit.

Why a roof lantern

A flat ceiling is a missed opportunity. Open up to the sky above the kitchen, dining room or hallway and the whole room changes.

Bring the sky in

A pitched glazed lantern transforms a flat ceiling into a piece of sky, flooding rooms with daylight at every hour.

Architectural feature

From contemporary to converted barn, a roof lantern is the architectural moment that makes a kitchen extension feel finished.

Slim sightlines

Just 50mm sash sightlines on the modern profile. Less aluminium, more glass, more sky.

Built to last

Thermally broken aluminium, toughened safety glass, hidden gaskets, marine grade fixings. Built for British weather.

Energy performance

Argon-filled sealed units with low-E coating deliver U-values from 1.0 W/m²K, comfortably ahead of Document L.

Fitted from the inside

No scaffold tower, no roof works. Most Infinity Lanterns are fitted onto your existing or new upstand in a single morning.

THE SYSTEM

The Infinity Lantern range

Infinity is engineered and manufactured in Britain by a specialist roof glazing company, and supplied by SmartaView direct to your door. The result is the lightest, slimmest, brightest pitched lantern available on the UK market.

- ✓ Slim 50mm sash sightlines for maximum glass and minimum frame
- ✓ Hip end, lean-to, pyramid, three way, four way and five way layouts
- ✓ Sizes from 1000x1000mm up to 6000x3000mm and bespoke
- ✓ Thermal break aluminium frame, powder coated in any RAL
- ✓ Toughened safety glass with self cleaning and solar control options
- ✓ Argon-filled sealed units with low-E coating as standard
- ✓ U-value from 1.0 W/m²K, ahead of Document L
- ✓ Hidden gaskets, no visible fixings, marine grade fittings
- ✓ Manufactured in the UK using genuine Infinity profiles
- ✓ Fitted onto your existing or new timber upstand

YEAR GUARANTEE

Real homes, real light

From the converted barn in the Cotswolds to the modern kitchen extension on a London terrace, here are a few of our favourite places an Infinity Lantern has come to life.

THE VIEW

Bring the sky down. Lift the ceiling up.

An Infinity Roof Lantern transforms a flat ceiling into a piece of sky, flooding rooms with light at every hour of the day, and turning a kitchen extension into the heart of the home.

INFINITY

SmartaView · Premium aluminium, delivered.

THE DETAIL

Pitched, framed, perfectly precise.

From hip end to four way pyramid, every Infinity Lantern is engineered to disappear into the architecture above the room. Just glass, light and the slimmest possible aluminium.

MADE IN BRITAIN

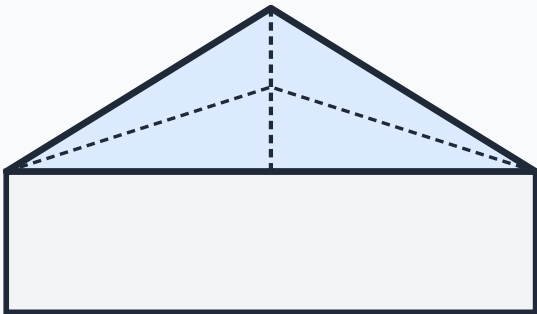

Configurations

Six core layouts cover almost every extension footprint. Each is fabricated to your exact dimensions, with the pitch and ridge calculated to suit your aperture.

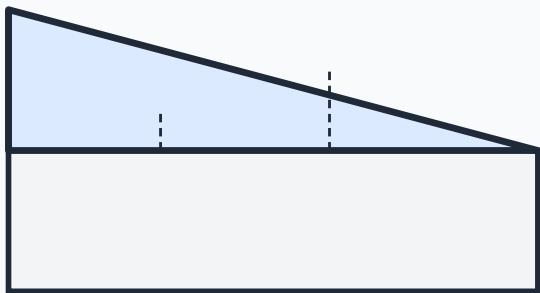

Hip end

The most popular layout. A long ridge with hipped ends. Suits most rectangular extensions.

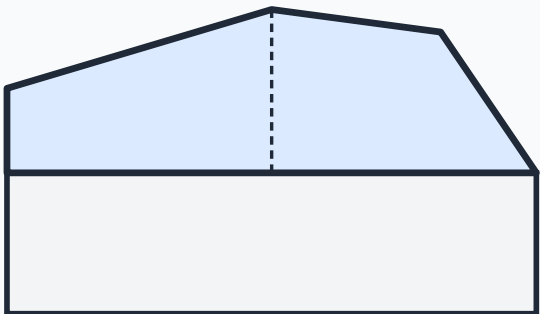

Pyramid

Four triangles meeting at a single apex. A statement on square or near square apertures.

Lean-to

A single slope against a wall. Brilliant for side return extensions and shorter spans.

Three way

Hip end with one truncated end. Used where the lantern sits over a window or chimney breast.

Four way

Symmetrical hip on a longer rectangular aperture. Generous central ridge.

Five way

Hip end with one extended bay. Striking on long open plan extensions.

THE GLASS

Choose your glass

Three glass finishes, each thermally toughened, argon filled and sealed with Thermal Super Spacer technology. Pick the look, the performance comes as standard.

Clear Low-E

SOLAR CLEAR · MOST POPULAR

Maximum daylight with an invisible low emissivity coating that keeps warmth in and blocks UV damage to furniture and floors.

Solar Grey

GLARE CONTROL

A cool grey tint that cuts glare and solar gain on south facing extensions, with a sharp architectural look from outside.

Satin Privacy

SOFT DIFFUSED LIGHT

A frosted satin finish that floods the room with soft, even daylight while keeping the view through fully private.

✓ Thermally toughened safety glass

✓ Argon filled with Thermal Super Spacer

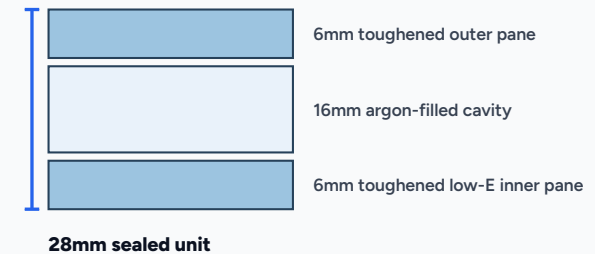

✓ Self cleaning coating available

✓ Black RAL 9005 border as standard

→ Pick your glass and see live pricing at smartaview.com · sales@smartaview.com

Inside the sealed unit

1.0 W/m²K

DOUBLE GLAZED

6mm panes, the standard spec, ahead of Document L.

0.5 W/m²K

TRIPLE GLAZED

The upgrade for passive grade thermal performance.
